TITLE OF INVENTION: MODIFIED NUCLEOTIDES AND METHODS OF PREPARING AND USING SAME

INVENTOR: 001 WARD,
INVENTOR: 002 LANGER,
INVENTOR: 003 WALDROP,

A S S I G N M E N T

WHEREAS, we, PENNINA R. LANGER, of Monsey, New York, ALEXANDER A. WALDROP, III, of Charlottesville, Virginia, and DAVID C. WARD, of Guilford, Connecticut, hereinafter referred to as the "Assignor(s)", have jointly invented "MODIFIED NUCLEOTIDES AND METHODS OF PREPARING AND USING SAME" and have jointly filed an application for United States patent based thereon, and so entitled, on the 17th day of April, 1981, Application Serial No. 255,223; and

WHEREAS, the said invention was conceived and first reduced to practice under Yale University auspices, and therefore Yale University, a State of Connecticut non-profit corporation located in New Haven, Connecticut, hereinafter referred to as the "Assignee", desires to acquire the entire right, title and interest in and to said invention and application, including any and all divisions and continuations thereof, and any and all Letters Patents which may be granted thereof, including any and all renewals, reissues, and prolongations thereof.

NOW, THEREFORE, for One Dollar (\$1.00) and other good and valuable consideration, the receipt whereof is hereby acknowledged, and pursuant to the terms of Yale University's Patent Policy effective as of April 15, 1981, the Assignors have

jointly and severally agreed to and do hereby jointly and severally sell, assign and transfer unto said Assignee, the entire right, title and interest in and throughout the United States of America, (including its possessions and dependencies) and all countries foreign thereto, in and to said invention, said application and any and all patents (including reissues and extensions thereof), of any country, which have been or may be granted on said invention or any part thereof, or on said application or any divisional, substitute, continuation-in-whole or -in-part, renewal, reissue or other patent application based thereon, or based upon said invention, together with the right in said Assignee to apply for such patent in its own name in all countries of the world where such is permissible by law, and the right to claim the benefit of the priority right provided by the International Convention of 1883, as amended to date, and any other such priority rights.

TO BE HELD AND ENJOYED by said Assignee, its successors and assigns, to the full ends of the respective terms for which said patents or any of them have been or may be granted as fully and entirely as the same would have been held and enjoyed by us and each of us had no sale and assignment of said interest been made;

AND we do hereby authorize and request the Commissioner of Patents of the United States of America to issue any and all

United States patents which may be granted upon said United States applications or any of them, or upon said invention or any part thereof, to said Assignee;

AND each Assignor does hereby agree for him(her)self, and for his/her respective heirs, executors and administrators, to execute without further consideration any further lawful documents and any further assurances, and any divisional, continuation-in-whole or -in-part, substitute, renewal, reissue, or other applications for patents of any country that might be deemed necessary by said Assignee to fully secure to said Assignee its interest as aforesaid in and to said invention or any part thereof, and in and to said several patents or any of them;

AND each Assignor does hereby covenant for him(her)-self and his/her legal representatives and agrees with said Assignee, its successors and assigns, that (s)he has granted no right or license to make, use or sell said invention to anyone except to the extent that (s)he or his/her successors in interest may be obligated to grant and/or have granted a certain license or title rights to the said invention to the Government of the United States of America, acting by and through the National Institutes of Health of the Department of Health and Human Services pursuant to certain grants between the said Government and Yale University, identified as Grants P01-GM20124, T32-CA09159 and T32-GM07499, which require said license and/or

title rights be granted to the Government and said rights shall survive unaffected by the execution and delivery of this assignment, and except to said Assignee, that prior to the execution of this deed his/her right, title and interest in said invention has not been otherwise encumbered, and that (s)he has not executed and will not execute any instrument in conflict herewith.
